CAUTION

ENGLISH

HOT: MICROWAVE

- Place pack in a microwave safe container.
- Heat pack at full power for 10 seconds time is based on 600 watt microwave.
- Heat pack from microwave and check for desired temperature. If pack is not hot enough, place it back into the microwave for 5 seconds intervals, not to exceed an additional 20 seconds.
- NOTE: Over-heating could cause skin burns or pack to rupture.
- Place pack into pouch and position pouch in desired location. Apply brace and tighten as needed.

- Remove pack and wait approximately one hour before reapplying.
- Do not heat gel pack on stove; gel pack should only be heated in the microwave.
- Place pack must be at room temperature before heating in microwave; do not microwave gel pack if frozen.

- Discontinue heating if gel pack expands like a balloon; such expansion means the pack is overheated.
- Before removing gel pack from the microwave, carefully observe the gel pack for any sign of possible rupturing or leakage; if any leakage is found, wait for the gel pack to cool before removing and discarding.

- Carefully check gel pack for desired temperature, if gel pack is too hot, allow to cool before reapplying.
- Excessive heating of gel pack could cause skin burns, gel pack deterioration, and possible leakage.

COLD: FREEZER

- Place pack in freezer for one to two hours.
- Remove pack from freezer.
- Place pack into pouch and position pouch in desired location. Apply brace and tighten as needed.

- Remove pack and wait at least one hour before reapplying to area. After application, return pack to freezer. Aspen Therapy Pack will remain flexible.
- Following use, inspect the skin everywhere gel pack has been applied; if any discoloration or redness occurs, discontinue treatment and consult a medical expert.
- Excessive use of cold gel pack could cause skin to frostbite.
- White frost-like residue may occur on the pack after use. If residue is visible, remove it with a soft cloth.

- Excessive use of cold gel pack could cause skin to frostbite.
- White frost-like residue may occur on the pack after use. If residue is visible, remove it with a soft cloth.

- Excessive use of cold gel pack could cause skin to frostbite.
